

BEEF LOW VOLTAGE STIMULATOR

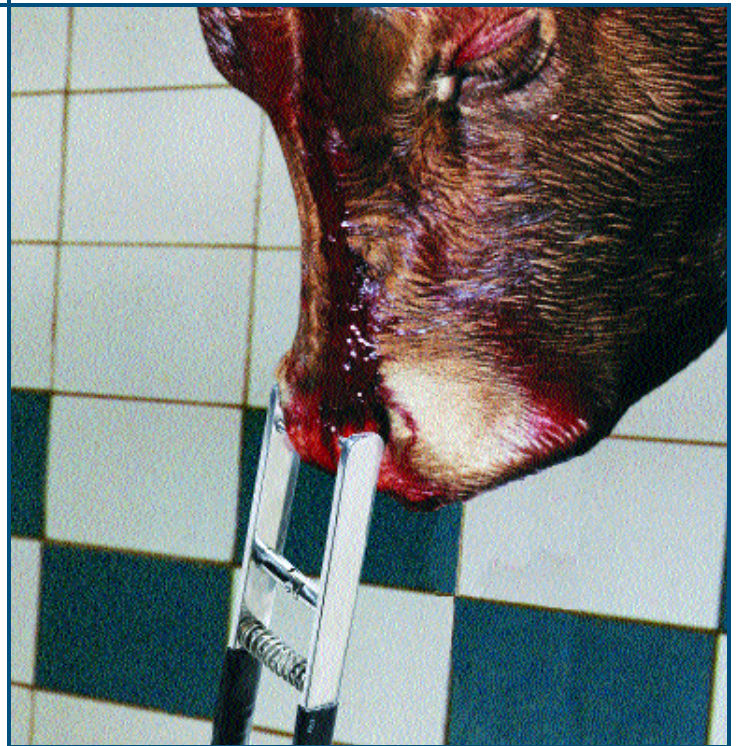

Model ES-4

The Jarvis Model ES-4 - electrically powered low voltage beef stimulator.

JARVIS

- The Jarvis Model ES-4 applies an exactly controlled electrical current (at a low voltage) to beef carcasses producing the following advantages:
 - Better blood yield
 - Accelerates the lowering of the PH - reducing the aging period and shrink loss (cold shortening).
 - Improves meat tenderness
 - Helps hot boning.
- Stainless Steel Tong

SHORTER AGING - REDUCES SHRINK LOSS

BEEF LOW VOLTAGE STIMULATOR

Model ES-4

Specifications

Drive	Electric
-------	----------

Model ES-4

Power Required	50 W
----------------	------

Operating Voltage	110 / 220 V, 1 phase, 50 / 60 Hz
-------------------	----------------------------------

Two Independent Stimulation Timers	20 seconds	36 seconds
------------------------------------	------------	------------

Stimulating Current	0.25A
---------------------	-------

Capacity	100 / hour
----------	------------

Control Handles

Electric Dual Buttons	12 V
-----------------------	------

Overall Dimensions

ES-4	11 x 11 x 6.7 in	279 x 279 x 170 mm
------	------------------	--------------------

Control Unit	11 x 7 x 6.7 in	279 x 178 x 170 mm
--------------	-----------------	--------------------

Weight

ES-4	6.2 lbs	2.8 kg
------	---------	--------

Control Unit	3.7 lbs	1.7 kg
--------------	---------	--------

Equipment Selection and Accessories	Order Number
--	---------------------

Model ES-4	110 V, 1 phase, 50 / 60 Hz	4043005
	220 V, 1 phase, 50 / 60 Hz	4043006
